

Omega Optical Filter Set XF106

FILTER SET COMPONENTS

Exciter:	XF1076 (400AF30)
Dichroic:	XF2040 (435DRLP)
Emitter:	XF3088 (435ALP)

OTHER INFORMATION

This set allows for simultaneous visualisation of the blue and green components of GeneBLazer (CCF2). It does not differentiate between blue and green signals. Contrast with XF124, which allows individual visualisation of the colours.
