

## Omega Optical Filter Set XF38

### FILTER SET COMPONENTS

Exciter: XF1020 (546DF10)

Dichroic: XF2015 (570DRLP)

Emitter: XF3016 (OG590)

### OTHER INFORMATION

Highly recommended for work using a mercury (Hg) light source. This set will also work for a xenon (Xe) light source, but in this case, the set will have a much dimmer signal than our XF34 filter set, which is more optimised for xenon arc lamps.
