

Omega Optical Filter Set XF57

FILTER SET COMPONENTS

Exciter: XF1053 (405-490-555-650QBEX)

Dichroic: XF2046 (400-485-558-640QBDR)

Emitter: XF3059 (460-520-603-710QBEM)

OTHER INFORMATION

This is a quadruple band set designed for imaging DAPI, fluorescein, Cy3 or rhodamine, and Cy5. Note that this set is recommended for CCD detection only, as the Cy5 signal is too far to the red to view by eye.
