

## Omega Optical Filter Set XF94

### FILTER SET COMPONENTS

Exciter:	XF1064 (415-535-630TBEX)
Dichroic:	XF2055 (400-535-635TBDR)
Emitter:	XF3068 (495-575-700TBEM)

### OTHER INFORMATION

This set is designed to allow simultaneous imaging of DAPI, Cy3 and Cy5. Please be advised that this set works best with a CCD detector since the emission of Cy5 is too far to the red for the eye to see.
